## DETAILED ACTION

### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 11-18 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of copending Application No. 09/430,390 (which is now U.S. pat. 6,695,290). Although the conflicting claims are not identical, they are not patentably distinct from each other because the lifting jack assembly and combination have already been disclosed and simply broadening the claims with a means clauses do not define over the previous patents allowable subject matter. Furthermore, the dependent claims also claim elements which do not distinguish over the previous application now patent. The general combination being set out in this application is inferentially claimed because all of the parts of the are parts of the previous application now patent.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 11-12 and 16-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Lewis (4616970).

Lewis discloses a lifting jack accessory having a sleeve means (the inside area of elements 14 and 16), an adjunct (12) with a clevis hole (62 which has a hole but not a through hole), a spike (which is the point of 44, by definition a spike is just a sharp point), a plurality of teeth (21), and a nose ( which is just one of the top corners of the adjunct ).

5. Claims 11-13 and 16 are rejected under 35 U.S.C. 102(a) as being anticipated by Akrep (6102351).

Akrep discloses a lifting jack accessory having a sleeve means (the inside area of elements 19 and 20 which is the inside of the tube), an adjunct (15) with a clevis hole (6), a chain lock (10) a spike (which is just one of the top corners of the adjunct), and a nose ( which is other of the top corners of the adjunct ).

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Berman discloses an invention.
